Company Profile

Founded in 2020, Ruup Architectural Products emerged as a beacon of innovation in the architectural industry. The company's inception marked a significant milestone, driven by a collective vision of its founders who brought diverse expertise in construction, sales, and management to the table.

In its early days, Ruup navigated the unique challenges of a global landscape undergoing unprecedented changes. Undeterred, the company embraced the spirit of adaptability and resilience, leveraging its founders' experience to carve a niche in the competitive architectural products market.

From its humble beginnings, Ruup Architectural Products swiftly gained recognition for its commitment to cutting-edge design, functionality, and sustainability. The founders' dedication to pushing boundaries and redefining industry norms propelled Ruup into the forefront of innovation.

Over the years, Ruup's product portfolio expanded, introducing a diverse range of architectural solutions that captured the essence of contemporary design. The company's emphasis on customization, quality, and customer satisfaction became its hallmark, fostering strong relationships with clients and collaborators alike.

As Ruup ventured into new markets, including the launch of its product distribution channel in Edmonton, AB, the company continued to evolve. Strategic partnerships, technological integration, and a focus on sustainable practices further solidified Ruup's position as a forward-thinking industry player.

Despite the challenges and uncertainties that characterized the early years, Ruup Architectural Products' journey from 2020 reflects a story of growth, resilience, and a relentless pursuit of excellence. Today, Ruup stands as a testament to the transformative power of vision and determination, shaping the architectural landscape with innovative solutions that embody the spirit of a new era.

BUSINESS DISTRIBUTION

Founded in 2020, Ruup Architectural Products is a Canadian company that emerged as a beacon of innovation in the architectural industry. The company's inception marked a significant milestone, driven by a collective vision of its founders who brought diverse expertise in construction, sales, and management to the table.

RUPP Architectural Products takes pride in its extensive business distribution network, offering a diverse range of premium tiles, wood panels, metal decors, and more to customers across the United States, Canada, and Mexico. Our commitment to quality and innovation is seamlessly delivered to clients through strategic partnerships with distributors, retailers, and construction professionals. With a strong presence in these North American markets, RUPP ensures that our architectural products are easily accessible to architects, designers, and builders, enabling them to create stunning spaces with our high-quality materials. As we continue to expand our footprint, we are dedicated to providing unparalleled service and reliable solutions, making RUPP Architectural Products the preferred choice for those seeking excellence in architectural elements.

1

Each cladding board needs to be supported by a joist between 300~500 mm from center to center . Mark the joist position before installation .The inside corner and outside corner need to be reinforce by vertical joist .

2

Predrill the holes on the joist .

3

It is recommended to predrill the holes around 15mm for the length on the board and the trim to allow the expansion and contraction response to temperature change.The predrilled holes size should be smaller than the screw head size .Moreover, the predrilled holes position of the board should be according to the joist .

4

The following steps are selected based on the situation.

With Corner Trim Accessories

1

Secure the corner trim onto the wall outermost edge with self-tapping screw.

2

When the corner trim are fixed ,install the wall cladding separately from each side ,insert the screws on the predrilled holes to fix the board.

Without Corner Trim Accessories

1

Use two cladding board to joint at 90 degrees ,fixed with self-tapping screw as shown in the following diagram.

5

Predrill holes is required to each cladding board, the second board is inserted into the first one and fixed with self-tapping screws.

6

It is not recommended to joint two cladding board directly for inside corner , 5mm gap needs to be left between two board.

GREENZONE LUXURY ALUMINUM WOOD SYSTEM

GREENZONE ECO WOOD

Product / BLA4020
Colour / TEAK

GREENZONE® Luxury Aluminum Wood is a sustainable and new environmentally friendly composite material made from 70%-80% recycled and 100% recyclable materials and aluminum.

LUXURY ALUMINUM TUBE SERIES

GreenZone Luxury Aluminum's new technology technology reduces moisture content of wood fibers to 0%, thus producing a composite material that exceeds the performance of wood, but is rich in warm texture. It uses durable composite material to prevent warping, mildew and fading. It is not only an environmentally friendly alternative to wood, but a professional, advancing choice for you.
