#### Sound Insulation

The acoustic structure of the cabin wall panel is a double environmental protection board covered with 1.0mm thick steel plate, and the acoustic cavity layer is specially treated; Ensure the comfort of the interior space.

#### Ventilation

The low-noise supply and exhaust fresh air system of the labyrinth design reduces the sound interaction inside and outside the cabin, and at the same time updates the cabin air with a 3-minute running effect.

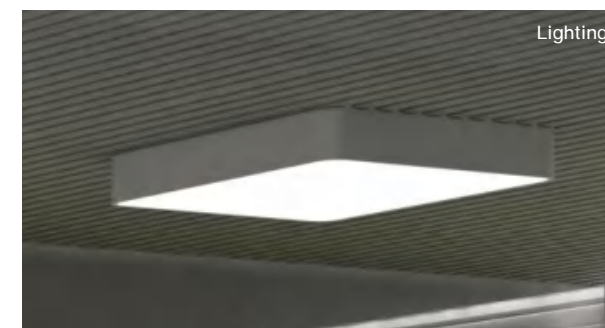

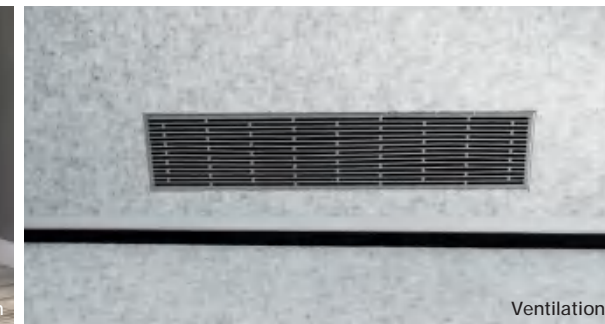

#### Lighting

The cabin 4000k natural light color temperature LED central lighting system, with 150Lsx lighting to meet the needs of daily use, professional lighting requirements The cabin is preset with an expandable power supply.

#### 220VPower

With 100-240V/50-60Hz/12V-USB power supply system, it is in line with the mainstream equipment and energy environment inside and outside the cabin.

# PRODUCT INTRODUCTION

## Imagine

A flexible and movable quiet cabin that can satisfy your many creative spaces.

Unconventional aviation aluminum, carbon composite panels, and cabin glass are its main materials.

Indispensable in work is the kind of passion and motivation, fine arrangement, sincere service, fully complying with your work needs, so that you can feel the perfect combination of fashion and practicality in your work.

Silent pods make it easy to build a personal audio space, having it doesn't mean it's comparable to a million dollar professional audio job, but what we can do is it's a very practical neutral sound environment that will give you an edge in listening Spatial or audio working conditions.

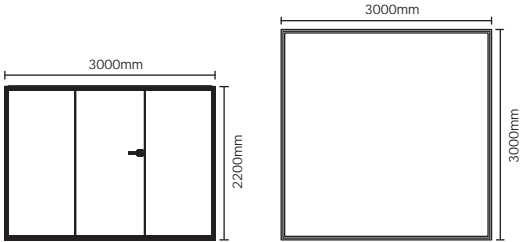

SILENCE BOOTH  
OFFICE SERIES

OFFICE  
*Revolution in the workspace*

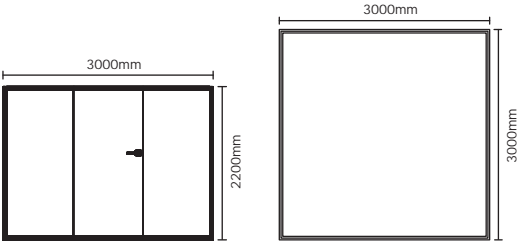

It's time to change, the post-90s and post-00s are not limited to restraint, the closed work space with restricted intervals, and the open work environment with no privacy, no longer catering to individuality. The fantasy space of an open and dynamic new generation...

SILENCE BOOTH  
LEISURE SERIES

LEISURE  
Entertainment space nobility

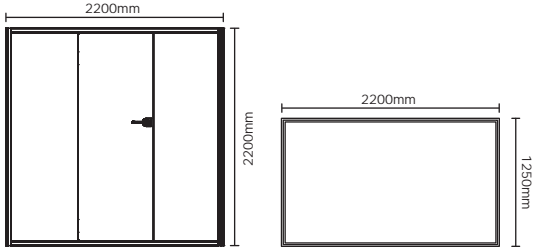

Nowadays, with the trend of younger enterprises, open office design has become the mainstream, and the space is more diversified and flexible. With the development of office space design concept, office design is gradually becoming more creative and interesting, and leisure areas have also received more attention. Various creative leisure area designs have also appeared in the office spaces of major companies.

SILENCE BOOTH  
INSTRUMENT SERIES

MUSIC  
Revolution in the Music education space

Music education is not limited to school courses, and off-campus chain training institutions are even more vibrant. The space and environment of musical instruments, which have been neglected by us, directly affect the sound and color of musical instruments and the musical cognition of students. Of course, the construction of traditional musical instrument practice rooms is not limited to environmental defects. Mutual interference and disturbance of sounds are the most painful points of off-campus music education places. , the site was adjusted so that all construction investment was wiped out. To this end, the flexible maneuverability and superior acoustic properties of this silent cabin arise spontaneously...
